"ENERGY SMART" Illuminated Indicators
show zero power consumption in stand-by mode.

Kobra 400 HS6 "ACCU-FLOW"

The powerful KOBRA 400 HS6 equipped with automatic oiling system offers its user the highest available security. Available in "Secret" or "Top Secret" versions, these machines utilize "floating head" technology. This design, unlike nearly all of its competition, is composed of individual teeth. This differs from other high security models which are single piece, brittle cutting heads, prone to cracking and damage. Damaging the head of any KOBRA High Security Shredder does not require costly head replacement. The KOBRA 400 HS6 also boasts the "ENERGY SMART" Power Management System, which uses zero power consumption in stand by mode. The KOBRA 400 HS6 has been tested and approved by many international governments and military bodies. It is approved for NSA 02-01 Specification. If your application requires a practical unit for high-volume, top secret applications, there simply is no competition to the KOBRA 400 HS6.
